SHIPMENT OF WATERMELONS

CARLOADS ARE NOW PASSING THROUGH PENSACOLA FROM THE P. & A. SECTION TO THE NORTH.

The watermelon season is now in full blast, and big shipments pass through Pensacola each night bound for the northern and eastern markets. In fact during the past week the heavy shipments have necessitated an extra train each night from over the P. & A. section to Pensacola in order to handle this extra freight.

While there were a few small shipments made last week the crop was not really in condition to be marketed before Monday, when several carloads were brought from the section along the P. & A. Since then the shipments have been steadily increasing, and since Tuesday a special train has been run out in order to bring the product to the market without delay.

The majority of the shipments come from the section between Marianna and River Junction, and it is said that the crop this year is an exceedingly fine one, and the planters will derive considerable revenue from the same. Owing to adverse weather conditions the watermelon crop last season was not as good as was expected, but this season it is expected that the shipments will be heavier than ever before known.

RETURNS HOME FROM THE SUPREME K. OF H. MEETING.

Alderman A. H. D'Alemberte, who is a grand representative of the Knights of Honor and also a member of the finance committee of the supreme lodge of that order, returned to the city yesterday after an absence of a week in Atlanta, where he had been in attendance upon the session of the supreme lodge.

Mr. D'Alemberte, who is one of a committee of three of the finance committee of the order, examined the books of the order and found that it is now in the best condition financially that has been known for years.

The session held in Atlanta was one of the most successful and harmonious ever held, and as very largely attended, especially by delegates from the southern states.

Something that Every Woman Needs
Beautiola, A Perfect Beautifier.

Beautiola is the latest product of Mrs. Ella R. Berry, of St. Louis, and New Orleans, La., a well-known dermatologist of twenty years' experience.

There has been a long felt want for a harmless preparation that would remove deep wrinkles, liver spots, and especially small pox pittings and all facial blemishes.

After many experiments on the worst cases that could be found, Beautiola has been pronounced by expert dermatologists to be the most efficacious small pox pitting remover known to science, there is no case of wrinkles that it will not immediately remove without and injurious effects.

Beautiola is the only preparation that completely obliterates all traces of care, worry, illness, exposure, age. Ten to twenty years fall like a mantle from the face after one week's treatment. Not a wrinkle, line or blemish remains to tell the story after using Beautiola one week. Beautiola is endorsed by the medical fraternity and expert dermatologists everywhere. It has made once beautiful but faded professional women as youthful at 40 or 50 as they were at 20, lengthening their career before the public at least 25 years.

There are many preparations on the market claiming to do this, but never make good their claims. Sold by Hargis' Pharmacy.
THE NAVAJO CLUB.
By special request the Navajo Club will give another one of those enjoyable hops and dances, which have added so much to the pleasure of Pensacola recently. Arrangements have been made to give one Tuesday night, June 27th. The steamer Monarch has been chartered for the occasion, and Barrios' orchestra has been secured.

ONE DEAD, TWENTY INJURED BY EXCURSION CAR WRECK

By Associated Press.
Poughkeepsie, N. Y., June 23.—Miss Lillian Moore, of this city, whose skull was fractured when two cars filled with excursionists crushed together at Fishkill landing early today, died several hours after the accident without regaining consciousness. None of the twenty others who were injured in the crash is thought to be fatally hurt. Both cars were crowded with Poughkeepsie people, members of an excursion party conducted by the Knights of Temperance of St. Paul's church. The brakes of one of the cars was out of order and the motorman attempted to let the car down the hill by using the reverse current. He had covered only a short distance when the trolley pole slipped from the wire, the current was interrupted and the car crashed into another one ahead.

RESIDENCE WAS DESTROYED

UNOCCUPIED HOUSE BURNED.

INCENDIARIES SUPPOSED TO HAVE STARTED BLAZE.

A two-story residence on West Belmont street, near St. John's cemetery, was destroyed by fire this morning shortly after 12 o'clock, an alarm, summoning the fire department to the scene being sent in at 12:30 o'clock. The building was unoccupied, and is a consequence must have been of incendiary origin. At least that is the belief. The residence was a complete loss, the department being unable to check the flames, which had gained such headway upon the arrival of the trucks that it was impossible to stop the spread of the fire. The alarm, however, was not sent into the truck houses until the fire had gained such headway that it was impossible to control it as when the trucks arrived the place was almost destroyed.
It was stated that the fire originated in the second story of the building, and it was noticed for some time by parties in the business section of the city before an alarm was sounded.

Lucky.
Stubb—No, I can't get along with my wife. To everything I say she retorts "I beg to differ with you!" Penn—You are lucky, old man. My wife just differs without taking time to beg.

A Different Proposition.
Mrs. Mark Etting—What are your chickens worth today? New Boy—I don't dare tell ye, ma'am. The boss sez I must only tell what we're sellin' 'em for.

Necessity does the work of courage.—Elliot.

The Rate of Human Growth.
"We grow at a uniform rate," said a physician. "There are rules of growth that unconsciously we all obey." "Take the average man. He grows as follows: 'First year, eight inches; second year, six inches; third year, five inches; fourth year, four inches; fifth year, four inches; sixth year, four inches. From the sixth on the growth is slower until the sixteenth year—it is only one and a half inches a year. The seventeenth year has a growth of two inches. The eighteenth year has a growth of one inch. At eighteen the average man is five feet eight inches high. Thereafter he grows no more.'—Philadelphia Bulletin.

Pausing uncertainly before a desk in the big insurance office, the Hibernian visitor said to the clerk, "O! want to tek out a pawlicy?"
